

WHAT'S BENEATH THE MUCK? IT'S CALOOSAHA TCHEE MARL GEOLOGISTS TELL ABOUT IT

Here's the muck, and under it is a marl. And what kind of marl, and what about it? The geologists call it, and as all have seen, are shells—fossils, the geologists call them.

The Caloosahatchee marl was laid down in the Pliocene age, which means that it is not an old formation.

All the average reader can digest about the geology of Florida is told in the twentieth annual report of the Florida State Geological Survey, a copy of which has just been received at the office of The Everglades News, and we are at once relaying to the readers all the "dirt" it has on this country we live in.

Combined with the report is an article on "Extinct Mammals of Florida"—that is, the elephants and other Ringling and Barnum & Bailey animals that used to roam around here and graze on the sawgrass and cypress.

The following columns of the latest report on what happened a million years ago or so is extracted from the geological survey report and will do for a Sunday's reading if you haven't got time for it now.

The deposits of Pliocene age in Florida are divisible into four formations, the Caloosahatchee marl, the Citronelle formation, the Bone Valley gravel, and the Alachua formation.

The Caloosahatchee marl was formed as a normal bottom deposit in a shallow, open ocean, filled with moderately warm salt water. It consists chiefly of fine sand, limy ooze and shells. The Citronelle formation appears to have accumulated in the deltas of large rivers and as a beach deposit along the Atlantic shore. It is composed of sand, gravel and lenses of clay brought from the north. No marine fossils have been found in it. The Bone Valley gravel also is in part a beach deposit, but the materials of which it is composed came from a different source. The Alachua formation is sand, clay and phosphate rock produced by the weathering and decay of the phosphatic sandy limestone of the Hawthorn formation. Most of it has changed its original position only by subsidence caused by the removal in solution of the lime and part of the phosphate in the Hawthorn formation and by the lowering of the surface of the underlying bedrock. The Alachua formation contains the Bone Valley gravel and the remains of many land animals.

The four Pliocene formations occupy different areas. The Caloosahatchee marl underlies the region east of the Citronelle area and south of the Bone Valley.

The Pliocene beds of the Caloosahatchee river, now called the Caloosahatchee marl, were first made known through the publication of the result of Angelo Heiprin's explorations on the west coast of Florida and in the Okeechobee Wilderness, made early in 1886. Heiprin collected from the marl the Caloosahatchee marl—extinct species of fossil mollusks that are not found in any Miocene deposit but that are associated with a greater number of living species than have been found in the Miocene.

Soon after Heiprin's reports were published, and again in 1892, Dall described the same formation under the name "Caloosahatchee beds." Matson and Clapp accepted the term Caloosahatchee marl for the Pliocene deposits in the neighborhood of Caloosahatchee river.

The Caloosahatchee marl includes all the known marine deposits in Florida and a bed containing extinct fresh-water shells which, according to

about three miles below the Seaboard Air Line Railway bridge at Indian Creek. Throughout this distance the Caloosahatchee marl, some of it hard rock, has been thrown up by the dredge. At the lower end of the canal the rock is hard and irregularly weathered as if by wave action on an exposed coast. This induration and weathering may have taken place on an early Pleistocene shore line. No exposures of the Caloosahatchee marl were found above water, but Pleistocene shell marl is visible almost continuously from the lower locks to within two miles of Port Mayaca. Above this point the banks are composed of barren sand, most of it white and brown.

Palm Beach county.—No exposures of the Caloosahatchee marl are known in Palm Beach county, but the formation lies close enough to the surface in the western part of the county to be cut into by the deeper canals. Dredges have brought up shells characteristic of the Caloosahatchee marl on the West Palm Beach canal from the entrance at Canal Point to Loxahatchee, 7.4 miles east of Twenty-Mile Bend. The beds overlying the Caloosahatchee marl in this part of the Everglades consist of fresh-water marl and limestone and a little brackish-water or marine sand, covered by six to eight feet of muck.

LETTER EXPLAINS DUTY OF BOARDS

Seeks to Avoid Confusion Over Powers of School Bodies

Confusion over the state where the duties of the general county school board and those of special tax school district trustees have seemed to overlap, has brought about an unusually large number of inquiries and requests for advice from the attorney general's department. The relationship which exists between the two boards is set forth in a recent letter from the attorney general to St. Petersburg marl as follows:

"School trustees are mere supervisors of schools within the school district. The fact that there has been a special district, created and a special tax levied, does not interfere with the jurisdiction and powers of the general county school board over schools within the district; and in like manner, as if the district had never been created.

"Schools within a special tax school district are entitled to a fair division of the general county revenue and the additional money that they raise by the special tax must be applied exclusively within the district. The school board has the right to make up an estimate and budget for the district but this budget is subject to the veto of the school board except that the school board cannot spend a special tax district fund for schools in the same manner which the school trustees have provided."

Hoe Hands and Feather Pillows

We have never heard of but one goose that laid golden eggs but a lot of Southern farmers say their geese are pretty nearly worth their weight in gold. They find them hardy, thrifty, easy to fatten, profitable to raise. No other farm fowl or animal asks so little.

E. L. Huey, of Crisp county, Georgia, thinks there is more money in geese than in any other form of livestock. According to his experience, fifty geese will keep 50 acres of cotton free of crab-grass, which means a saving of \$40 per acre. He says he has picked at least 25 pounds of feathers from the fifty geese and gets \$1 a pound for them. From the 50 geese he counts on raising at least 15, to sell at \$1.25 each.

The goose population of Van Zandt county, Texas, has doubled in the past three years and the demand exceeds the supply. One farm manager says he has 1,000 geese and would like to have as many more. The geese are used to keep down grass in the cotton fields and to kill Johnson and Bermuda grass. They save labor bills and pay

WOULD PROTECT GROWER'S SALES

Suggested That Department of Agriculture Locate an Agent Here

The following letter has been addressed to H. A. Spilman, senior marketing specialist of the U. S. Department of Agriculture's bureau of agricultural economics, by the editor of The Everglades News:

"Can you provide me with a copy of the Produce Act or the law (or section of law) under which your bureau functions?"

"I judge that provision is made for investigating sales of produce at the very point, and it occurred to me that an agent of the Bureau might well be stationed at the shipping end, particularly where there are heavy local sales."

"Two years ago I brought about the operation of a marketing agency in this territory, local interests furnished quarters and bore part of the other expenses, and the facilities and service are to be bettered this season. Office space for a marketing specialist can be procured at any town in the upper Everglades that seems best suited to the purpose."

"I am making this suggestion because it seems to me that unless investigations can be made at both ends, the inquiry is incomplete and is likely to be unfair. The last session of the Florida Legislature provided for a State Marketing Commission and made a generous appropriation, as no doubt you know, and I suggest that you consider my suggestion after conference on the subject with Commissioner L. M. Rhodes of Jacksonville."

BIG ACREAGE OF RITTA POTATOES

But Beans Will Be Major Crop on Southwest Side of Lake Okeechobee

CLEWISTON, Aug. 21. Seed-beds for fall crops of eggplant and pepper have not yet been prepared in this section, and the major portion of the fall planting of truck crops will likely be beans. W. C. Hooker, the Waldrons, Julian, Rob, Wash, Tom and L. L. Lowe are among the number preparing ground in the Ritta Beach district. At Ritta, Walter Brown, K. C. Smith, South, Wingfield and the Seminole Farmers have begun getting land in shape. There will be around 100 acres of fall beans in that section, with some early planting of onions and cabbage. Potatoes will go about December 1, since the Ritta section is comparatively free from frost, and a group is now combining with the intention of planting about 100 acres at that time.

The pump plant at Ritta Beach is operating efficiently, and no danger of flooding out from back water is anticipated. Growers in the territory from Sugar Junction to Clewiston for the first time, in many years feel some assurance that fall-planted crops will come to maturity. This feeling will undoubtedly tend to increase the acreage which will go into crop prior to the first of the year, though the tendency may be balanced or overcome by the lack of financing for additional acreage.

Fertilizer houses were never so busy in this section as they are now. Financial aid, and neither local or east coast banks, under circumstances existing in Florida at the present time, feel warranted in advancing money to truck farmers. Outside capital must be had then from individuals sold on the prospects and possibilities of this section.

FINDS PAHOKEE IS PROSPERING

Editor of Okeechobee's Newspaper Says Town Points Way To Others

William Griffith of Okeechobee, a member of the Okeechobee flood control district board, was a guest speaker at the Pahokee Luncheon Club and on his return home he printed in his newspaper, The Okeechobee News, the following reference to Pahokee:

Last Friday we attended a luncheon tendered to Dr. W. H. Lair in honor of his appointment on the Drainage Board. Dr. Lair, who is president of the Bank of Pahokee and one of that section's largest farmers, is peculiarly fitted for the position the governor has tendered him. The Pahokee Bank and Dr. Lair are big factors in the development of that section. Pahokee made up of every-day hard-working farmers, who 11 months ago were nearly wiped out by the hurricane.

Dr. Lair and his bank have faith in their section, and in the ability of ordinary working people to develop a country without the assistance of money "rich development angel." Their faith is proven. We were struck with the idea that Pahokee was the most prosperous small town in Florida.

There is building going on there. There are more deposits in the bank than ever before, development money belongs to a class representing every walk in life, and is not the property of a few large developers. It is a most healthy condition.

The people in Pahokee appeared to be very contented. Not a "quack" did we hear about hard times. They are too busy planning for the future, building homes, packing plants, business buildings, etc., to worry about the hard times in other communities where people quit work after the boom and have not yet returned to labor that produces wealth.

We speak of Pahokee as including Canal Point also. At that meeting they were organizing a Rotary Club with Howard Sharp as its president. In other cities where people do not work so well and their paper the lake is still low for this time of year and it looks like we are going to get by this year without a flood if all our outlets are kept open. Of course, we can't tell what the fall rains will bring, but I think if we have a normal season we will not have a flood this year. Wish you would send me the Everglades News to Oklawaha, in care of Tippi McCure.

The last issue you sent was July 26, so please send the late issue to the time you get this letter. The best news I get from up here is through The Everglades News. Any news you send me will certainly be appreciated.

Yours very truly,
O. B. McCLURE.

Dr. Lair and Cashier Kilpatrick have proven also that there can be no prosperous banks in Florida when such banks take a direct and personal interest in small crop loans. Other bankers in Florida tell us that the Pahokee Bank is one of the soundest small financial institutions in Florida, and their success and prosperity is based upon the prosperity they have helped to provide for the small farmer, and small land owner. This is not necessarily a boost for the bank but it is used as an example to other bankers who have been more interested in realty loans than crop loans, and who have not succeeded half so well. We like Pahokee and it is refreshing to mingling with its people.

LUNCHEON CLUB GETS ORGANIZED

Absences from town on business cut down the attendance at the meeting Friday of the Pahokee Business Men's Luncheon Club and this limited the business transacted but gave opportunity for the president, Howard Sharp, to make a sort of "presidential address" for which there had not been time at the previous meeting.

The president thanked the members for according him what he thought was a high honor and a real distinction. "It is usual for the president of an organization to put the responsibility for success or failure on the members—to pass the buck by saying that the outcome depends on the co-operation of the members give," he said. "The fact is that the chief responsibility is on the president, for he must conduct himself as to merit, and win co-operation; if he fails in his part there will be failure and if he succeeds on his part the club will be a success. I want your co-operation and support for it as your club as much as mine, and the prestige of the organization involved, and our personal pride in the community should inspire and sustain us for the purpose to make our membership in the club of personal value and to make the club of value to the community, but I recognize I have no right to take the honor of the presidency and then leave it to others to do all the work. I hope and believe we shall work together with mutual profit."

The figures for the state, the Kissimmee river watershed and the Everglades show that average monthly rainfall in August of 1929 and that the low level of the lake and canals and the low ground water levels is due to the use of the drainage facilities and that rainfall has not been deficient.

A SKETCH OF OUR TRIP NORTH
We had good hard surface roads from Canal Point to Ottawa, Canada. The roads were well marked and a good motor with a man in his hands need not stop and ask the way out of town. We found every one most courteous to strangers. Of all the states, the most trouble we had in finding our way was through New York state where we were tried and did go around New York City and crossed the Hudson at Yonkers ferry and the roads were not marked at all, so we really wished we had gone through New York City which we did come back and had no trouble.

We visited many places of interest, one of which was the old Plymouth rock where the Pilgrims landed, and drove the route that Paul Revere rode the night of the Revolution.

The parliament house in Ottawa, Canada, was beautiful but not as our own capitol building, Vermont.

RAINS NORMAL ALL OVER STATE

Good Moisture Condition Here Due To Use of Facilities For Drainage

The average rainfall in July reported from 83 Florida stations was 8.23 inches, or about an inch above normal, according to the report of the U. S. Weather Bureau.

Figures for the Kissimmee river watershed are incomplete, Kissimmee and some other stations in the area not reporting, but at St. Cloud the July total was 8.87 inches, an excess of nearly two inches. At points on the margin of the St. Johns and Kissimmee watersheds, rainfall in July was above normal.

There was heavy excess rainfall at Fort Lauderdale, Davie and other points in the lower middle glades.

C. P. Sheffield of the U. S. Department of Agriculture field station at Canal Point reports 37.69 inches of rain since January 1.

This is 10 inches more than fell to that date in 1927 and is within a few inches of the total rainfall of 1929 and that the low level of the lake and canals and the low ground water levels is due to the use of the drainage facilities and that rainfall has not been deficient.

A Letter From O. B. McCLURE
Garden City, Kans. Aug. 14, 1929

Mr. Howard Sharp, President of the Pahokee Luncheon Club, Dear Mr. Sharp:

I received The Everglades News you sent me. Was very glad to get them since we hadn't heard much from Florida since we left.

We hear all kinds of reports about the Everglades out here, but nothing direct from there. I see by your paper the lake is still low for this time of year and it looks like we are going to get by this year without a flood if all our outlets are kept open. Of course, we can't tell what the fall rains will bring, but I think if we have a normal season we will not have a flood this year. Wish you would send me the Everglades News to Oklawaha, in care of Tippi McCure.

The last issue you sent was July 26, so please send the late issue to the time you get this letter. The best news I get from up here is through The Everglades News. Any news you send me will certainly be appreciated.

Yours very truly,
O. B. McCLURE.

IN BANKING AND DRAINAGE

To the north of us, less than ten miles, is the south boundary of Martin county and we are made to be interested in that county by that propinquity which is so often the source and cause of love and by the circumstance that this county in which we live, Palm Beach county, is the mother county of Martin.

Up in Martin county last week, or recently, the county commissioners adopted a resolution which has intrinsic warrant for comment; the resolution is noteworthy because it touches on a subject that is a burning issue in the eastern and the western part of Palm Beach county, which said resolution is in words and figures as follows, to-wit:

"Whereas Martin county has been seriously crippled by having tied up in local banks now closed, over \$500,000, with little prospect of being able to revive but a small percentage of this sum, and whereas to do no effort has been made to recover this money or fix the responsibility for its loss, and whereas the county commissioners of Martin county feel that this money was under state control and deposited in state banks as provided by law, therefore they request that the Governor, the Honorable Doyle E. Carlton, direct some competent person to proceed to Martin county and make such investigation as is necessary to place the responsibility for the loss, and to take such action as may be necessary to recover as much of this money as may be possible to salvage."

In its words the resolution states facts that describe a condition in Palm Beach county; in its figures it backs a million or so dollars of getting it all.

The commissioners of Martin county "feel that this money was under state control and deposited in the state banks as provided by law," but it is well, for editorial interpretation, to go further and say that the state official in charge of state banks is the state comptroller; that, however, is not enough; it is necessary to say that the state comptroller is Ernest Amos, now of Tallahassee, formerly of Santa Rosa county.

Being state comptroller isn't all that Mr. Amos is. Among other positions he holds he is a trustee of the Internal Improvement fund and a commissioner of Everglades drainage district, and right there we get real interested; the discussion loses its academic aspect and gets practical—through the state superintendent of banks we may lose our money but through maladministration of the drainage district we may lose our lives.

Some four years ago The Everglades News recorded the simple fact that the presence of Ernest Amos on the board of commissioners of Everglades drainage district was a handicap to the development of the region and a threat against the lives of the residents; that laid down a predicate and was proved to be a sound premise by the disasters of 1926 and 1928 which resulted from the policies Amos supported on the board of commissioners of Everglades drainage district. An enemy of the people was a high lake level and the maintenance of the offices of the board at a point (Tallahassee) that suited the convenience of Amos and his associates and to the great inconvenience of the residents of the district.

Ernest Amos is still state comptroller and ex-officio a commissioner of Everglades drainage district. He was re-elected at the last general, and if he was re-elected because he was the best man in the Democratic party of Florida for the position, that furnishes an excellent reason for the fact that a Republican at the next election, some nice boys who are holding county offices going down to defeat with him.

When The Everglades News made its anti-madness on the Amos drainage policy it got scant support in those quarters from which now comes a good deal of criticism of the state comptroller, and this newspaper is just human enough to grin as much as a newspaper can grin at the contortions of those who it left to stew in their own juice when they left us to the risk of dying in flood waters.

We washed our hands of responsibility for Ernest Amos as a supervisor of banks when we failed to get support in our condemnation of his drainage district policies, but

we submit to those who denounce Amos as a supervisor of banks that his errors as a drainage commissioner antedate the evidence of his incapacity in the other position and are more pronounced.

If Amos shows ability to correct his course as a drainage commissioner, he will assist to those policies that the residents of the drainage district have indicated as the proper course, we can believe that he is able to correct his errors as a commissioner of banks.

Mr. Amos is serving his last term as a state official; his last term as a state official will not make him obsolete, however, for he has to consider whether he will retire by limitation of his term or whether he will face the impeachment charges for which there is addition of support since the last session of the legislature.

In our opinion—"to out way of thinking," as Al Smith says—Mr. Amos has learned

his lesson as to drainage matters. He has his hands too full of other matters to try to impose his Tallahassee views on us in this.

It might be a good idea for the governor to act on the request of the county commissioners of Martin county; the investigation might well extend further if Mr. Amos wants to get his dander up. On the other hand the state comptroller can show a contrite spirit and earn a measure of sympathy that will warrant other branches of the state government in letting him alone while the others strive with patience and understanding to work out the problems for the solution of which Mr. Amos isn't quite adequate.

MARKETING PROBLEMS

Right now when preparations are being made for the planting of the green bean crop that will be ready for marketing in ninety days is a good time to talk about the conditions under which the selling will be done.

The Everglades News has a deep interest in the conditions under which the chief vegetable crop of this region is sold, for most of the paper's patrons are growers of vegetables and how much business the newspaper is to do will depend on how much profit the growers get; our patrons must have money before they can spend it, we use it or anyone else. And this newspaper has a deep interest in the matter, likewise it is clear in its interest in the subject.

In the first place, the growers must use in the coming season the agencies of marketing that exist now; it is too near picking and selling time to depend on any association that will be organized and set a functioning some time in the future. What support we may give to associations to be organized in the future will depend on what kind of an association it is and who is promoting it. A part of the clear view is that no support will be given strangers who "blow in" or to any resident who makes a claim on money for the salary and the graft he thinks he can get.

There are three methods of selling the Everglades truck crops: 1. Shipping to a responsible commission house; 2. turning the goods over to a broker; 3. selling for cash in the field or on the platform or in the car.

There are some who are commission men. There are firms that have handled Florida fruits and vegetables for a quarter of a century and have as their local representative men who live among us the year round. It has not been proved that the system of consigning to responsible commission houses should be abandoned, all of a sudden.

There are honest brokers. There are men who live in the Everglades the year round who know markets just as well as the strangers who come in here every year, full of big promises. Our resident brokers can render service and their services should be used until it is demonstrated beyond all question that a better system has been found.

We have a good f. o. b. market in the upper Everglades. More vegetables are sold for cash at the loading stations in this section than in any part of Florida. The grower who objects to the price offered by the f. o. b. buyers often is told by the grower to expect too much; often it is the greedy grower who will not accept a fair cash price for his stuff that becomes a sucker and turns his shipment over to a slick-tongued solicitor he never saw before that season.

Not every grower can "hit" and not every grower can "get the top." Anyone who has lived in other trucking centers knows that the so-called co-operative associations have not solved the marketing problem. It is because the selling and distribution end has not been taken care of that legislatures and congresses are still making laws.

A serious mistake has been made, we believe, in hooking the loaning of money with the selling of produce. Just now there is the situation in the upper Everglades that many growers are interested in proposed co-operative associations, because there is a hope that the members can borrow some money. That habit of loaning some money to a grower does not make a sound foundation for a safe selling organization.

We are going to have to depend in the next season on the same agencies that we have depended on before; the important thing is to make the men who ask for growers' shipments "come clean" and explain just what their deal is and who they are. No law will ever be able to give every grower absolute protection, because it is beyond the ingenuity of law-makers to provide against every scheme that may be evolved by crooks. There must always be some responsibility on the grower to use his head, get informed and act on sound judgment.

GOVERNOR AT BOXING BOAT

From The Tallahassee Democrat

Governor and Mrs. Doyle Carlton attended a boxing bout at Tampa recently. They had scarcely been seated when the chief executive of the state was recognized and a demonstration which lasted until Carlton entered the ring and shook hands with the winner began. The governor's stand on race track gambling and operation of race tracks in the state the reception from two thousand "sportsmen" was as spontaneous as any ever given. A champion the governor refused to make a speech and contented himself by saying he hoped the best man would win the bout.

Nobody should be startled by the pama parade, the parade and the college boys having made the night parade commensurate years ago.

PRESS COMMENT

From Glades Papers

Howard Sharp has a bathtub in his printing office at Canal Point. Carl Walker has a shower bath in his farm barn. This is putting the world on notice that Lake Okechobee publishers and farmers are just a step or two ahead of any thing else in their lines in Florida.

Okechobee News.
Howard Sharp's paper, The Everglades News at Canal Point wears a new type of type (the jumbos?) this week, displaying a new foot of type, which is more legible than the type of the Moore Haven Democrat.

LETTERS

Miami, Fla. Aug. 14, 1929.
Mr. Howard Sharp, Editor, The Everglades News, Canal Point, Florida.

Dear Sir: I wish to thank you for the very fine editorial in The News of last week.

An article in your issue of the 10th inst. will find the new members of this board anxious to serve to the end that some constructive program may be formulated for the good of the Everglades district.

Personally, I shall at all times be glad to hear from you or anyone else in the future of this great area for constructive suggestions.

Yours very truly,
M. A. MILAM.

Mr. Milam is a member of Everglades district drainage board.

South Bay Aug. 15, 1929.
Editor, The Everglades News.
In the August 9 issue of The Everglades News you ask for expressions of opinion from residents of the upper Everglades district as to the advisability of having a formal observance of the anniversary of the 1928 drainage disaster.

Since those people whose lives were snuffed out by the hurricane are doubtless not much concerned with what we do or do not do about it, the question would seem to resolve itself into a matter of expediency.

Undoubtedly, such observance would constitute "adverse publicity" to the drainage district, understood. But, in fact, would not adverse publicity of that kind be the best kind of publicity at the present time? It is not advisable to keep state and national attention focused on the necessity for flood control and drainage, until such time as appropriate national legislation is enacted?

We believe that the National Government—due to the War Department regulations concerning the water level to be maintained in Lake Okechobee—is not guilty of the fearful destruction of life and property in September, 1928. What could be more appropriate, then, than that some official representative of the national government should be the speaker of the occasion? Such a speaker could be requested to state what the attitude of the federal government is at the present time. It may be said by those who may object to such a proposition that we already know what the government attitude is, and that it is favorable. The answer to such objection is that restoration of such favorable disposition would serve the good purpose of making it stronger and more obligatory.

We all know that the lake can be controlled—that the Everglades can be properly drained. We all know that the lake will be controlled and that the Everglades will be properly drained. But must we wait until another hurricane lays waste the country and kills thousands of people?

Let us hope not.
Let us have the formal observance of the disaster.

Yours truly,
JOHN WYSE.

people could be found than now when they await the promise that provisions will be made against repetition of that disaster.

"Just now most of our people make their living from their truck farms, and truck farming is commonly, and erroneously, thought of as a quick money game, but the real money has been made in the Glades by the men who stock it and regard farming as an occupation instead of a gamble."

CANAL POINT

Miss Eva Love gave a party Wednesday night at her home. Those there were Theron Whidden, Lincoln Whidden, James Miller, A. J. Caples, Lewis Averitt, Mr. King, R. P. Todd, Byron Todd, Mary, Virginia Sims, Fred Mansfield and Sarah Cox.

Mrs. J. E. Stafford accompanied her mother, Mrs. J. W. Hitch to Gainesville, where he will visit friends there.

Mr. and Mrs. Frank O'Connell announce the birth of a daughter, J. J. Geiger and family are vacationing in Georgia.

Mr. and Mrs. W. J. Marsh have returned to Canal Point from a visit to Soperton, Ga.

Mr. and Mrs. Charles Tedder have gone to Gainesville, where he contemplates buying a home. Paul, who is looking after the Tedder farm here, will return to Gainesville soon where he will continue a college course.

Miss Jewel Blackie, who has been visiting Miss Catherine Channan, has returned to her home in Sarasota.

Mr. and Mrs. Vincent Stadnick spent the week end with her parents in Bowling Green.

Miss Mervin Berry of Alachua is visiting her sister, Mrs. C. R. Warrington. Her father came with her, but went to Lake Worth to visit a son there.

Mr. and Mrs. Jack Barrett left the latter part of last week for Safety Harbor, a west coast resort, and will be away two weeks.

Miss Julie Graves, public health nurse, was a visitor Monday. Miss Graves had charge of the nursing service here at the time of the influenza epidemic last winter.

Dr. and Mrs. Hyson were in town Tuesday. Dr. Hyson is a dentist and will open an office in Lake Worth. Mrs. Hyson is a former Miss Hunter, school nurse under the Keweenaw Club, and is arranging for five children each week to go to the dental clinic in West Palm Beach.

Miss Synhorst, Red Cross nurse, was here Tuesday making her usual calls.

Bergen entertained her Sunday school class at a picnic Wednesday.

Misses J. H. Hayes and little daughter Eva were weekend visitors at Mr. and Mrs. John Philpott. Mrs. Hayes is the mother of Mrs. Philpott. This was their first trip to the Everglades and they were very much impressed. Eva stayed to spend a few weeks with the Philps.

Mr. and Mrs. Ernest Bass and Bessie Thomas drove out Sunday from West Palm Beach to visit with Mr. and Mrs. John Philpott.

L. L. Stuckey visited Moore Haven the first of the week. Articles in The Everglades News lately about old times and the changes that have taken place made his father curious to see Moore Haven again, for the elder Mr. Stuckey was an early settler that a canal be cut through the ridge from Lake Okechobee to the Pelican lake to get his fishing boats through made a landmark that is still referred to by old-timers as "Stuckey's ditch". Over at Moore Haven the only thing Mr. Stuckey recognized was the cypress tree that has been the chief landmark on the west side of Lake Okechobee since the first white man came into the upper Everglades.

MONEY IN YAMS
There is a sweet potato field on E. M. Scott's farm in Eagle Bay that is worth seeing. It was planted by T. W. Jones and Mr. Gillispie and contains thirty varieties. From a little over three-fifths of an acre there has been sold over \$300 worth of potatoes. Okechobee News.

CALLERS
"Phil Y. Cason of Indianapolis passed through Canal Point Saturday on his way to Rittia, where he used to live and where he retains interests. His half-brother, Mr. Brown, is on his Rittia place. Phil and his folks were the first settlers in the Rittia district. He and C. H. Ruggles of West Palm Beach have a grove near Indian town. Mr. Cason is the county commissioner from the Indian town district of Martin county."

Dr. R. L. Ward and H. L. Donald of West Palm Beach came out yesterday to look around. The doctor owns a place on the ridge and he invited Mr. Donald to make the trip to Panhook with him. They said they were glad to be able to carry word back to West Palm Beach that things looked better here than they had ever seen Mrs. Philpott. This was their first trip to the Everglades and they were very much impressed. Eva stayed to spend a few weeks with the Philps.

NOVELTY WORKS IS OPENED HERE

Daniels & George Move Business and Equipment Here From St. Cloud

J. F. Daniels and Edl George of St. Cloud, have opened a novelty-working and blacksmith shop in the building south of the Canal Point Garage formerly occupied by Thomas & Barrett as a Gulf Refining Company warehouse. Thomas & Barrett now have their office and warehouse south of Pahokee, where a large plant was put in by the Gulf company.

Space temporarily sufficient for the Daniels & George business will be secured by making a 20-foot extension, to give the building a size of 20x75 feet, a small building on the rear of the lot being intended to make room for the extension.

With five men, some using tools direct to machines and some to run drive-shafts, there is power for a large number of wood-working machines to make inside trim and finish, store fixtures and do all of the jobs that are generally known as "stuckey's ditch". The blacksmithing end is as well equipped in its own department.

An important part of the firm's business as St. Cloud was making tools for trucks and making and repairing automobile tools.

In addition to the larger machines there are sprayers for painting, electric hand-saws and shapers and other small tools to which they are attached.

With complete equipment backed by skill and experience, Messrs. Daniels & George are in position to handle the work of the upper Everglades a line of services that will be very useful.

DRY GOODS STORE

T. H. Dean of Vero Leases
Hoop Building and Will
Open Next Week

T. H. Dean of Vero Beach has leased the 24x100-foot building on Corners highway just completed by Mrs. A. L. Pope and will start moving the store fixtures in early next week. He was here Sunday and said he was very anxious to put in the stock of goods at once but she required him to wait until the third cost of paint was dry.

It is understood Mr. Dean will carry a stock of goods and notions. His was only one of the several applications Mrs. Pope has made in the building. It is completed; being an instance of the demand here for buildings of all classes.

The location is north of the Coburn hardware store.

MODERN SHOP FOR REPAIR OF SHOES

A shop with a large line of equipment for the repair of shoes has been opened by E. S. W. Holland in a house near the Canal Point garage. The machines are motor-driven and this called for the extension of the power line, which was made the latter part of last week, thus putting the shop in commission.

Shop equipment and supplies were brought here from Winter Park in the belief that this section will furnish more business than that.

Mr. Holland has a shoe repair shop at Vero Beach that his son W. W. Holland operates. He says they do a large mail order business.

PEOPLE WE KNOW

Jim Kimbrough, well known among Everglades growers as a commission house selector and f.o.b. buyer, passed through Canal Point Monday on his way from Belle Glade to Vero Beach. He had a car full of beach sand and said he had sold a good many loads at Belle Glade and was going to try to sell the rest at Vero Beach. Last season he was with V. A. Stewart & Company but he says he will not be with that firm next season.

DRAINAGE AND CONTROL ADVANCED BY NEW LAW

The Everglades and Lake Okechobee flood control bill enacted by the legislature was characterized as the most important legislative action in Florida during the past 50 years by E. Bruce Youngs, state county representative, in an address Tuesday before the Miami Exchange club.

COMMUNITY GOSSIP

A collection of machines and tools that proved too big an equipment for a town of much larger population than Canal Point and Pahokee has been moved and installed at Canal Point because of the conviction of the owners that although there are not as many people here, there certainly is more money and more prospect of growth than at the former location. This is Daniel & George's blacksmith shop and novelty works, brought here from St. Cloud.

Likewise Mr. Holland has moved a shoe shop here from Winter Park. Winter Park is a good town, the significant thing is that a fair, unprejudiced judge finds that East Beach is better territory.

All machines in these two new shops are electrically-driven. Good thing about having service from the Florida Power & Light Company is that these new businesses could come here because they could use their motors, but if there wasn't a big generating station at Pahokee it is likely that Messrs. Daniel & George and Mr. Holland would not have come here.

A genuinely hearty welcome can be extended to Messrs. Daniel & George and Mr. Holland because their businesses supply a need; they are not competitive, they are not in conflict with any other established businesses. No one loses any trade or money because they come; on the other hand, they will bring trade and money into the territory.

Every new motor hooked up on the lines of the Florida Power & Light Company justifies Vice President Joe H. Gill and District Manager Charles H. Ellis in their judgment that the investment in the Everglades of the money of the stockholders of the company was sound business judgment. When the railroad and the light & power company make money they establish the credit of the company with investors in general.

And now here's the point: We've got the Florida Power & Light Company in here and we've got Daniel & George and Mr. Holland and the other men who use motors and current in all forms—radio sets, newspaper presses, wafting fans, and it is up to us to give these power users enough patronage so they can stay here. Men are bringing in mechanical equipment to serve our needs, creating values and adding in keeping our money in circulation. They cannot stay here unless there is reciprocity. This statement is a re-statement of "Patronize home industry," but it is sound sense even if it is old. The tomato grower who wants a favor to keep out Mexican tomatoes is in effect saying "Patronize home industry," and the grower should be as fair to his neighbors as he asks congress to be to him.

UNION CHURCH

Those who are concerned to wonder as to the waste of effort on the part of our local pastors in holding church services when all services are being broadcasted in highly efficient form should have been present at the Union church building at any hour between 11 o'clock Sunday morning and 10 o'clock that night.

They would have seen such refreshing and spiritual refreshment of their eyes were opened to behold things spiritual that would be concerned no more about the question of the labor of those connected workers being wasted.

In the zeal for efficiency which swept the world fifteen or twenty years ago ambitious individuals strove to "cut out" all unnecessary effort and put everything, spiritual as well as material, on an efficiency basis.

It was a splendid movement if not carried to extremes.

The far-sighted thinkers of that hour saw the mistake and held up the future civilized man for inspiration—over-developed brain, under-developed body, living on tablets of concentrated food, an individual existing only to further his own interests.

On the crest of this wave, the scientific mind of Germany rose triumphantly until the Kaiser looked upon himself as annihilator of the rest of mankind except his own followers.

That was too heavy a dose of efficient self-seeking and the world would not stand for it. The aftermath of this movement has been a turning toward higher ideals, an universal brotherhood, instead of an individual seeking his own advancement, humanity seeking to advance its brothers, the weak as well as the strong, each for the common good.

Christ had brought this ideal to earth but earth could not receive it. His ideas until it learned its lesson in that terrible holocaust of selfishness, the World War.

Never again will efficiency hold supreme place in the minds of advanced thinkers.

So the radio will have its place in the world's economy but never can it take the place of human fellowship nor fill the heart of a shared experience in Christian living.

If you are still warm and human in your ideals, come and find fellowship and sweet communion in working to bring in the kingdom of Him who taught us that we are brothers, children of the Most High.

Our hours of service for next Sunday, Aug. 25, will be church school at three o'clock, and church at eight o'clock in the evening. The Apostle Paul says, "Let us not forsake the assembling of ourselves together."

Mrs. Wm. Jesse Thomas.

M. E. CHURCH NOTES

Sunday school, 9:45 a. m.
Prayer services, 11 a. m. and 8 p. m.

Prayer meeting, Wednesday 8 p. m., followed by a social hour. The Ladies Aid will hold an all day meeting with Mrs. Bergen next Tuesday.

Rev. Schuyler E. Garth, district superintendent of the Miami district, was an over-night guest at the parsonage Monday.

INQUEST CLEARS MAN

LA BELLE, Aug. 18.—A verdict of death by accident returned yesterday by a Henry county jury in the case of the death of Winton Curry, 34-year-old cattleman, cleared his neighbor, Paul Schrier, of a charge of manslaughter. The jury in the case of the death of Curry, died when he dived into a drainage canal to take a swim and apparently struck his head on a protruding rock. The injury at the base of his skull at first led officials to believe that he might have met with foul play.

NEWS FROM AROUND THE BIG LAKE

MOORE HAVEN

From The Democrat.

J. H. Peoples of Citrus Center, made a business trip to Tampa last week.

Mr. and Mrs. Carl Berner of Cleveland, were guests of Mr. Lloyd Zorn last Thursday.

V. F. Thrisk and George Brown made a business trip to Fort Pierce Saturday.

Mrs. Edna Sufficiency of Washington, has accepted a position as clerk in Dowd's Drug Store. Mrs. Sufficiency is a niece of C. L. Blackburn.

Mr. and Mrs. Mike Hopperich and Mr. and Mrs. Thurston Foster of Pahokee, Mr. and Mrs. T. P. Salquist and J. P. Kahn were guests of Mr. and Mrs. C. D. Bever of Fort Myers at a swimming party at Crescent Beach Sunday.

C. R. Brooks of Okeechobee, who is active in the fishing industry on the lake, was a visitor in Moore Haven Wednesday.

WHIDDEN APPOINTED IN GLADES COUNTY

J. H. Whidden, a former county commissioner, was appointed this week by Governor Carlton to serve as administrator for the remainder of the present term. Mr. Whidden succeeds E. G. Crofoot, resigned recently when continued ill health necessitated his leaving the office. Mr. Whidden was in the office by a small majority in the primary last year—Glades County Democrat.

OKEECHOBEE

From The News.

Capt. T. A. Bass of Pahokee, was a business visitor here on Wednesday.

Frank Bradley is operating a tractor on land he expects to plant this fall. It is generally understood that he will be very busy farming until the hunting season opens.

E. C. Forte who has been F. E. agent here since last September, has been transferred to Okechoa. Gaston Hamilton has been transferred here from Belle Glade to take his place.

L. W. Jennings, Judge J. E. Lory, J. C. Louthan, Slim Stewart and J. W. Crutland left Wednesday morning for Texas with the view of looking over that state and locating there. They expect to be gone about 10 days, and will make a thorough investigation of conditions out there before deciding to move.

Canal Point, Florida

SOUTH BAY

Harold Lockmiller and H. B. Walker are now working at the South Bay Garage.

Betty Rawie, daughter of W. H. Rawie, has been spending the first ten days in West Palm Beach visiting her grandparents, Capt. and Mrs. E. E. Forbes.

The Woman's Home Demonstration Club will meet hereafter on the fourth Friday of each month instead of the first Thursday as formerly, the next meeting being on Monday, August 23 at the home of Mrs. H. C. Willis.

L. J. CoCoven spent several days in Miami over the week end on business returning to South Bay on Monday.

General Superintendent Perkins of the Southern Sugar Company spent last Saturday at South Bay inspecting the work being done in this project zone. The company now has a topping ditcher at work in this zone digging lateral ditches through the cane fields every eighth of a mile. The ditcher has been at work since Tuesday and is digging ditches from two to three feet in width and from three to four feet in depth. It is thought that this will give adequate drainage for cane on the muck lands.

Dr. G. B. Sartoris, who is now in the U. S. Army, is in charge of the Palm Beach Post recently wrote the announcement of the marriage of Mr. Sartoris and Miss Jeanne Barras. Mrs. Sartoris has made many friends in this vicinity during her stay here. She is in charge of the Home Demonstration Club work, not only by the excellence of her work but also by her pleasant personality all of whom join in wishing her a long and happy married life.

James Stather, resident engineer, and Mr. Scullin, local electrician, made a trip to Miami Wednesday to see Mr. J. B. Jeffries concerning drainage district matters.

Rev. John R. Hoch brought his family from Miami last week and will remain permanently. They will occupy the Farmhouse until the passage of the drainage bill.

The Walton duck houseboat has sunk at its moorings in the North New River canal.

The Square Deal Mercantile Company, under the efficient management of Mrs. George Alberts, is planning to hold an interior decoration, adding many new counters to display their merchandise.

Mrs. J. M. Taylor, Martha and James, Jr. of Lakeland, accompanied by a nephew, are in South Bay visiting Mr. Taylor.

Mr. Frederick H. Chapman, who has been a delegate of the Woman's Home Demonstration Club to the Farmers and Gardeners Convention in session. Mrs. Denton went in a car chartered by the Dade county delegates for the trip. There were 25 delegates from Dade and Palm Beach counties on the bus. Mrs. Denton reports that there were over 1,200 present at the convention with Boys and Girls Clubs, Home Demonstration Clubs, Boy Scouts, as well as county agents and home demonstrators, farmers and farmers' wives and many other distinguished persons.

County Agent Mounts was present and proved to be of great assistance in making everyone feel at home with their neighbors and

the Southern Sugar Company now has a large building to be used as a commissary under construction at its quarters at South Bay. The building for the commissary is being driven to rock and the building will be well constructed.

J. P. Allison was out from West Palm Beach last week, inspecting his land in the vicinity of the new canal project, preparatory to starting his full farming operations.

Mr. N. S. Roper is leaving for Georgia on his vacation immediately.

South Bay has a shortage of houses and apartments at present. Every day someone is inquiring for a house or apartment to rent.

Pemberton, mother of Frank Lockmiller, Belle Glade has been here for a week taking care of Mr. Lockmiller and infant son, Luizo Ernest.

Arthur Wells, prosperous farmer living three miles west of South Bay on state road No. 25, reports that he will be picking beans in 10 days. He is starting on a 10-acre patch of Giant Striped beans and has 14 acres more coming on and is planting Bonafide.

Okeechobee has been dropped from the league.

CLEWISTON

Aug. 20, 1929.

The local ball club hit the usual tough spot Sunday when they jumped to Shawano for a double-header and lost both games. The first was a routine, ending in a 9-2 score. The games were featured by the hitting of Baker and the fielding of Brady and Chaffin for the Clewiston Club, and by Monte, double and triple in the first game, and the all-around play of Maxwell and Bell for Shawano. Canal Point plays at Clewiston next Sunday.

The tennis tournament being run on the court at the Inn, has only one first round match to be played, Woodham vs. Anderson, which will probably be played Wednesday. In matches so far completed, Jeffries won from Cole 6-2, 6-2; Beat, Kerr, 6-1, 6-8; Miller won from Tom Stubby 7-5, 6-3; and Jackson trounced Jeffries, 6-2, 6-2.

James Stather, resident engineer, and Mr. Scullin, local electrician, made a trip to Miami Wednesday to see Mr. J. B. Jeffries concerning drainage district matters.

Rev. John R. Hoch brought his family from Miami last week and will remain permanently. They will occupy the Farmhouse until the passage of the drainage bill.

BELLE GLADE

(By Miss Alice Reed)

Aug. 20, 1929.

G. E. Tedder is erecting a duplex house on his lot north of the Boree road.

The new ten-cent store has opened for business in the proprietor's new building adjoining the Belle Glade store.

The Rutledge bottling works of West Palm Beach has established new buildings adjoining the Belle Glade store.

Mr. Tedder is erecting a real estate office on Avenue A, north of the city hall. It will be occupied by himself and G. P. Farnell in a general real estate and insurance business.

Mrs. George Rawls and daughter, Odell have returned from a pleasant vacation spent near Nashville, Tenn.

The Belle Glade Home Demonstration Club met Thursday with the secretary, Miss Reed. A record attendance was noted. After a business meeting, Mrs. Morgan held something of a general review of crops, spoke of the shop and marketable articles and stressed the importance of proper nutrition serving a light salad as a demonstration. Mrs. G. S. Parker served lunch with it.

The American Legion Post No. 20 gave a dance at their hall Thursday night, which was largely attended and a good time enjoyed.

Mr. and Mrs. Fred L. Williams returned this week from an extended trip to the middle west. Mr. Williams is president of the Building Material Company here, and in his absence, J. G. Althaus, manager, has been in charge.

A former agent for the Clewiston Sales Company, R. B. Pitt of Delray, was in Clewiston for several days assisting Dick Miller, local life insurance agent.

Leonard Ames, assistant to W. G. Ames, construction engineer of the company, is in Havana for a week visiting former friends and associates.

Due to the present conflict of dates between the feature pictures of the Glades theatre and the dates of the Legion, there will be no dance at the Clewiston Inn, after the one scheduled for the 12th of September, under the auspices of the local post of the Legion.

In connection with the Labor Day celebration sponsored by the Better Business-League of Clewiston the day's festivities will conclude with a dance at the Inn. The committee in charge, Morgan, Blate and Miller, have announced a program of sporting events and contests for children and adults that will fill the day. The Shawano-Clewiston hall game in the afternoon will be the headliner of the program.

PLANT-FISH HOUSE

A. N. APGAR Manufacturer 1106 N. W. 34 ST. MIAMI, FLA.

W. H. Marshall of Fort Lauderdale, who has been a prime-mover in getting a tariff placed on Florida vegetables, will meet the farmers here Thursday night, to talk over the marketing question. This was the working of the new marketing commission.

Rev. Schupler Garth, district superintendent for this district, was up from Miami Monday to look over records and to meet the trustees and members of the local church. He delivered a sermon Monday evening at the American Legion hall.

Around The Lake

Okeechobee News: Carl Daugherty, who has been doing the electrical repair of the dredge Okeechobee, belonging to W. J. Conner, and which was badly damaged by the hurricane, is about through with this work. Mr. Daugherty expects to move to Orlando where he will have charge of maintenance work on two ice plants.

Moore Haven Democrat: Dr. and Mrs. D. M. Draught spent several days this week as the guests of Dr. and Mrs. D. M. Draught while en route to Cuba on a vacation trip. The two doctors served together during the World War, both in training camp and overseas. This was their first meeting since dismissal from service.

Okeechobee News: At the meeting of the Business Men's Luncheon Club several serious matters pertaining to the welfare of the community were discussed. Question of crop loans was taken up and carried over for another week. An attempt to prevail on Puggy Bill to furnish a duck dinner failed dimly. School matters and flood control headquarters came up for discussion.

Okeechobee News: Miss Cornelia Crozier will leave Monday for Smithville, near Kansas City, Mo., where she will visit her sister for a few days before going to Vancouver, where she sails on the 29th for Shanghai, China. She will be stationed at Soo Chow. Miss Cornelia returned from there 13 months ago where she had done missionary work for five years. She taught at Uppergrove Beach school last term and had expected to teach in the Okeechobee high school this term, but she received a cable urging her to return to the missionary field.

T. P. Winter, former agricultural instructor of the Moore Haven high school, now has a position with the state plant board and is stationed at Frostproof.
